FON MARKETPLACE

FON Marketplace is an online technology platform designed for family offices to access private deals and connect with other family offices to co-invest, research luxury goods and services, share philanthropic ideas, and more. It was created to streamline the process of investing in a private placement, which today is still an antiquated system, and help family offices access the best luxury opportunities using a proprietary algorithm.

FON PHILANTHROPY

Family Office Networks' Philanthropy Division hosts special events scheduled throughout the year, devoted to philanthropic news, and thought leadership, a quarterly philanthropy newsletter, and member-only philanthropic opportunities and fund-raising platforms. In addition, Family Office Networks works with service provider members such as accountants, attorneys and others who help families with philanthropic planning and to provide an outlet for them to educate families on special opportunities and tax advantaged giving.

INVESTMENT CLUB

FON's Family Office Investment Clubs offer families with a typical minimum net worth of \$50 million the opportunity to join clubs that reflect their areas of interest, including regional groups such as the Palm Beach Investment Club and newly launched specialty clubs for Women, Art and more. As an example, the Palm Beach Investment Club enjoys a strong membership base of 20-25 family offices representing families from around the country whose wealth is derived from a variety of industries, businesses and legacies. The Club meets or speaks weekly or monthly, depending who is available at various times throughout the year. Family Office Networks is unique in that it has the strongest distribution network of family offices seeking to allocate which is a proven competitive advantage and these new Investment Clubs bring investors together with the intent of getting deals funded and closed in a more efficient manner. Typical deals range from \$20-\$100 million and span various industries.

Lorem ipsum, or lipsum as it is sometimes known, is dummy text used in laying out print, graphic or web designs. The passage is attributed to an unknown typesetter in the 15th century who is thought to have scrambled parts of Cicero's De Finibus Bonorum et Malorum for use in a type specimen book.
